Dear Parent/Carer

National Child Measurement Programme for Year 6

Every year in England, school children in Reception and Year 6 have their height and weight checked at school as part of the National Child Measurement Programme. Since lockdown commenced in March 2020 statistics show that children who were already struggling with their weight have been eating and sleeping more during this enforced period and exercising much less when compared to their routines a year ago. The harmful effects that lockdown has had on children demonstrates the essential role this initiative achieves.

Height and weight measurements are used to calculate weight status. We collect this information because it is in the public interest to understand how many children are overweight; healthy weight or underweight. Your child's class will take part in this year's programme.

The checks are carried out by registered school nurses or trained health care professionals. Children are measured fully clothed, except for their coats and shoes, in a private space away from other pupils.

Working Safely During Covid-19 Pandemic
The School Nursing Team will be adhering to Government and NHS Guidelines whilst working within schools. This will include robust hand hygiene and cleaning arrangements for the measuring equipment and environment used. The team will be wearing Personal Protective Equipment (PPE) and a risk assessment will have been completed.

The information we collect and what it is used for is listed below:

- your child's date of measurement, sex and date of birth are used to calculate your child's weight category
- your child's name, date of birth and NHS Number are used to link your child's measurements in Reception and Year 6. Other data sets may also be linked such as your child's dental survey results or any visits to hospital they may have had. Linking your child's information in this way helps us to understand how and why the weight status of children is changing, and how this affects children's health
- your child's ethnicity and address are used to help understand some of the reasons for the difference and changes in child weight across England
- your address is required to send you your child's feedback letter. This will include your child's measurements together with information about healthy eating, being active and related activities available in your area.
- your email address and telephone number are required as we may contact you by email or telephone to discuss your child's feedback or offer you further support following your child's height and weight measurement.

All the data collected is also used for improving health, care and services through research and planning.

All this information is treated confidentially and held securely. No individual measurements will be given to school staff or other children.

We are currently part of the MapMe research project run by Newcastle University. The project aims to support parental knowledge and awareness of child weight status, and look at how child weight status changes over time. Children will be measured during this school year and in 12 months' time. We will share de-personalised data with the project team, including your child's date of birth, date of measurement, age, sex, height, weight, weight category, ethnicity, and publicly available information about the wider postcode that you live in, for research use. If your child is currently in Reception, the project will also link to their National Child Measurement Programme information when they reach Year 6. **If you would like more information on the MapMe project you can either call (asking for the School Nursing team) on 01926 495321 EXT: 7494 or send an email to swg-tr.moathouseschoolnursing@nhs.net.**

This study was approved by the Faculty of Medical Sciences Research Ethics Committee, part of Newcastle University's Research Ethics Committee. This committee contains members who are internal to the Faculty. This study was reviewed by members of the committee, who must provide impartial advice and avoid significant conflicts of interests.

Withdrawing your child from the National Child Measurement Programme

If you are happy for your child to be measured, you do not need to do anything.

If you do not want your child's height and weight to be checked, or your child has a medical condition that affects their height or weight please let us know using the contact details provided below:

You can either call (asking for the School Nursing team) on 01926 495321 EXT: 7494 or send an email to swg-tr.moathouseschoolnursing@nhs.net, stating your child's name, date of birth and school. We require you to do this by Thursday 2nd June 2022.

Children will not be made to take part on the day if they do not want to.

Withdrawing your child from the MapMe Research Project

If you do not wish for your child's de-personalised information to be made available to the MapMe research project, please let us know using the contact details below:

You can either call (asking for the School Nursing team) on 01926 495321 EXT: 7494 or send an email to swg-tr.moathouseschoolnursing@nhs.net, stating your child's name, date of birth and school. We require you to do this by Thursday 2nd June 2022.

If you wish to discuss either the measurement programme or the hearing screening you are welcome to contact your school nurse.

How the data is used

The information collected from all schools in the area will be gathered together and held securely by Coventry School Nursing service. We will store your child's information as part of their local child health record on the NHS's child health information database and share it with their GP.

All the information collected about your child will be sent by us to NHS Digital. NHS Digital is responsible for collecting data and information about health and care so that this can be used to monitor and improve the care provided to people across England.

The information collected about your child will also be shared by NHS Digital with Public Health England but in a de-personalised form only. This means Public Health England will

not be able to identify your child. Public Health England is responsible for working to protect and improve the nation's health.

Both NHS Digital and Public Health England will use the information from the National Child Measurement Programme to better understand numbers and trends in child weight and body mass index (BMI). This helps with the planning of services to support healthy lifestyles in your area. No information will ever be published by NHS Digital or Public Health England that identifies your child.

De-personalised information from the National Child Measurement Programme may also be shared by NHS Digital with other organisations, such as universities. This is to help improve health, care and services through research and planning. This information cannot be used to identify your child, and NHS Digital only ever shares information for research with the approval of an independent group of experts.

How your child's data is collected and processed as part of the National Child Measurement Programme (NCMP)

Local authorities have a legal duty to collect the NCMP data. They do this by following guidance from Public Health England. Local authorities are responsible for making decisions on how the data is collected and for making sure it is protected. Local NCMP service providers are contracted to carry this out; this might be through the school nursing team working in schools or a local healthcare provider. The team collecting the data enter it into the NCMP IT system, which is provided by NHS Digital. The data may also be entered into a local child health information system. Your local authority is responsible for sending the data to NHS Digital. NHS Digital and Public Health England are jointly responsible for the data held at a national level. Your local authority is responsible for the data held locally.

The chart below displays what happens to your child's data as part of the NCMP.
