Dear Parent/Carer

### **National Child Measurement Programme for Year 6**

Every year in England, school children in Reception and Year 6 have their height and weight checked at school as part of the National Child Measurement Programme. Height and weight measurements are used to calculate weight status. We collect this information because it is in the public interest to understand how many children are overweight, healthy weight or underweight. Your child's class will take part in this year's programme.

The checks are carried out by registered school nurses or trained health care professionals. Children are measured fully clothed, except for their coats and shoes, in a private space away from other pupils. The School Nursing Team will be adhering to Government and NHS Guidelines whilst working within schools. This will include robust hand hygiene; cleaning arrangements for the measuring equipment and environment used and a risk assessment being completed.

The information we collect and what it is used for is listed below:

- your child's date of measurement, sex and date of birth are used to calculate your child's weight category
- your child's name, date of birth and NHS Number are used to link your child's measurements in Reception and Year 6. Other data sets may also be linked such as your child's dental survey results or any visits to hospital they may have had. Linking your child's information in this way helps us to understand how and why the weight status of children is changing, and how this affects children's health
- your child's ethnicity and address are used to help understand some of the reasons for the difference and changes in child weight across England
- your address is required to send you your child's feedback letter. This will include your child's measurements together with information about healthy eating, being active and related activities available in your area.

1

**Russell Hardy - Chair**  
Glen Burley - Chief Executive

- your email address and telephone number are required as we may contact you by email or telephone to discuss your child's feedback or offer you further support following your child's height and weight measurement.

If your child's measurements are outside of the normal range for their Body Mass Index (BMI) this information will be recorded on their school health record and you will be notified by letter within 4 weeks. The weight and height information is shared only with you, it is your choice if you share the information with your child.

Letters are not sent out if your child's measurements fall within a normal range. If you would like to know the measurements please contact your school nurse.

All the data collected is also used for improving health, care and services through research and planning.

All this information is treated confidentially and held securely. No individual measurements will be given to school staff or other children.

### **Withdrawing your child from the National Child Measurement Programme**

If you are happy for your child to be measured, you do not need to do anything.

If you do not want your child's height and weight to be checked, or your child has a medical condition that affects their height or weight please let us know using the contact details provided below:

**You can either call the School Nursing team on 01926 495321 EXT: 7494 or send an email to [swg-tr.moathouseschoolnursing@nhs.net](mailto:swg-tr.moathouseschoolnursing@nhs.net), stating your child's name, date of birth and school. We require you to do this by Wednesday 22<sup>nd</sup> November 2023**

Children will not be made to take part on the day if they do not want to.

If you wish to discuss the measurement programme you are welcome to contact your school nurse via the above telephone/text/email.

**For advice and support during these uncertain times you can visit some of the following websites for more information and support on your mental health and wellbeing.**

### **How the data is used**

The information collected from all schools in the area will be gathered together and held securely by Coventry School Nursing service. We will store your child's information as part of their local child health record on the NHS's child health information database and share it with their GP.

All the information collected about your child will be sent by us to NHS Digital. NHS Digital is responsible for collecting data and information about health and care so that this can be used to monitor and improve the care provided to people across England.

The information collected about your child will also be shared by NHS Digital with the Office for Health Improvement and Disparities (OHID) which is part of the Department of Health and Social Care (DHSC) but in a de-personalised form only. This means OHID will not be able to identify your child. OHID focuses on improving the nation's health so that everyone

can expect to live more of life in good health, and on levelling up health disparities to break the link between background and prospects for a healthy life.

Both NHS Digital and the Office for Health Improvement and Disparities (DHSC) will use the information from the National Child Measurement Programme to better understand numbers and trends in child weight and body mass index (BMI). This helps with the planning of services to support healthy lifestyles in your area. No information will ever be published by NHS Digital or the Office for Health Improvement and Disparities (DHSC) that identifies your child.

De-personalised information from the National Child Measurement Programme may also be shared by NHS Digital with other organisations, such as universities. This is to help improve health, care and services through research and planning. This information cannot be used to identify your child, and NHS Digital only ever shares information for research with the approval of an independent group of experts.

Yours sincerely

Emma Austin  
School Nursing Clinical Lead  
Coventry Family Health and Lifestyle Services

### How your child's data is collected and processed as part of the National Child Measurement Programme (NCMP)

Local authorities have a legal duty to collect the NCMP data. They do this by following guidance from the Office for Health Improvement and Disparities part of the Department of

Health and Social Care (DHSC). Local authorities are responsible for making decisions on how the data is collected and for making sure it is protected. Local NCMP service providers are contracted to carry this out; this might be through the school nursing team working in schools or a local healthcare provider. The team collecting the data enter it into the NCMP IT system, which is provided by NHS Digital. The data may also be entered into a local child health information system. Your local authority is responsible for sending the data to NHS Digital. NHS Digital and the Office for Health Improvement and Disparities are jointly responsible for the data held at a national level. Your local authority is responsible for the data held locally.

The chart below displays what happens to your child's data as part of the NCMP.
